„We are born to dream, to create, to rebel, to be free. Do not lose your ability of wonder about simple things in life, and follow your heart. Go where your curiosity can take you, feel the Momentum, be driven by passion, honesty and intuition. Always challenge yourself to do something new, explore, and keep the awareness of the beginner“

Hi, I'm Nestor Campos, a spanish architect and designer, based in Scandinavia, who focuses on architecture, furniture and urban spaces.
